INVESTMENT EXPERIENCE

Independent Investor & Portfolio Analyst

2018 – Present

- Manage a six-figure personal portfolio with a 7+ year track record, focused on long-term capital allocation across equities and digital assets through disciplined reinvestment.
- Apply combined fundamental, technical, and macro analysis to evaluate asset quality, market structure, liquidity dynamics, and execution risk.
- Monitor portfolio concentration, drawdown, and downside risk against explicit limits, prioritizing capital preservation and consistency over short-term performance.

Quantitative Trading Research — Independent Project

2024 – Present

- Built a 6-engine quantitative trading framework in Pine Script v6 (~5,000 lines) combining trend, smart-money flow, volatility, macro liquidity, price structure, and seasonality into normalized composite signal scores per asset.
- Engineered a 5-asset cross-class rotation backtest reporting Sharpe, Sortino, Kelly fraction, profit factor, and max drawdown across rotating equity, commodity, and bond positions.
- Designed a 10-country global liquidity dashboard using independent macro drivers (M2 supply, policy rates, FX) to produce 12-week forward projections for risk-asset prices.
- Developed a 40-ETF sector rotation engine using Relative Rotation Graphs to classify assets across leading, lagging, weakening, and improving quadrants with a 0–100 conviction score.
